

Sales & Marketing Officer

This is not a traditional job post because we're not a traditional company

About Us

We are 64 Robots! Founded in 2016, 64 Robots is a full-service agency focused on creating beautiful, clean Vue.js single page applications with a Laravel backend. We think of ourselves as an extension of our customers' teams—whether that's building an AAA product, consulting on their business and marketing needs, or helping them pitch to investors, we are deeply invested in our customers' successes.

We've grown considerably in our 7+ years and we are working on numerous projects with a staff of around 25 people, including 3 designers and 3 project managers. We're seeking a Sales and Marketing person to assist us in growing our portfolio.

Our Goal

Primarily, we have been a dev-ops shop, building custom leading-edge platforms for our clients. However, we have recently developed a modern civic site platform that is built with modern frameworks and architecture that make it extremely performant on the web.

We are interested in taking this product to market, however, despite having excellent development and operations processes, we are lacking sales and marketing knowledge. This is where you come in.

About You

We are not only looking for someone to help us sell the modern civic platform, but someone to help us expand our sales and marketing department. You will have autonomy to lead and create while helping us grow a unique product and company. We are looking for someone who is goal oriented, a problem solver, driven and can work independently. It would also be amazing if you had experience selling tech platforms in the past.

Stuff you get (benefits)

1. Work from anywhere (really, as long as you can work States hours, feel free to work anywhere)
2. \$30 + commission
3. 15 hours per week to start. For the right person, we will quickly increase the working hours.

4. Upon Hire (after 90 days):
 - a. Up to 25 days of paid vacation and holidays
 - b. 8 weeks of paid parental leave
 - c. Unlimited sick/bereavement leave
 - d. Home office credits on hire
 - e. Monthly wellness stipend up to \$100/month for gym, etc
